MnCHOICES Support Plan Preview

Webinar
July 1, 2015

Learning Objectives

- Describe in general the MnCHOICES Support Plan following a MnCHOICES Assessment

- List at least three functions of the MnCHOICES Support Plan, including how the ability to calculate rates will be incorporated into the support plan application

- Have an initial understanding of the benefits of the MnCHOICES Support Plan and how it may impact your work

MnCHOICES

1

Today's Session is

- A "sneak peak" at the MnCHOICES Support Plan

  - Content from the MnCHOICES Assessment

  - Content entered in the Support Plan

  - System generated service rates as part of MnCHOICES Support Planning

*Mn*CHOICES

2

Today's Session is NOT

- **Training or policy**

- The **final version** of the MnCHOICES Support Plan.

  - There are bugs that need to be tested and fixed before we go live.

  - The application is under development. Additional functionality/screens are being added.

What is the MnCHOICES Support Plan?

The MnCHOICES Support Plan:

- Is a web-based application for support planning and rate setting. It includes both the Community Support Plan (CSP) and Coordinated Services and Supports Plan (CSSP).

- Will replace other paper support plans such as DHS-6791B.

- Will be used by assessors, case managers, and other lead agency staff.

- Is used online. No offline capability.

- Will display 95% of the data gathered in the MnCHOICES Assessment.

What is the MnCHOICES Support Plan? Continued from slide 4

- Will provide user the ability to calculate disability waiver rates via the "Services" tab as they are calculated today in the Rate Management System (RMS).

- Process for calculating unit rates for disability waiver rates will remain the same in the MnCHOICES Support Plan as it is in RMS.

- After the MnCHOICES Support Plan is launched, lead agencies will not use RMS for rate calculations.

5

What are the benefits of the MnCHOICES Support Plan?

- Provides one access point and one source for support planning

- Informs and pre-populates support plans with information collected during the MnCHOICES Assessment, including eligibility determination

- Improves efficiency

- Standardizes support plans across lead agencies

When will the MnCHOICES Support Plan be available?

- Launch plan is under development
  - Incremental launching of counties and tribes to support plan
  - Fast path to rates functionality for lead agencies waiting to launch full support plan.
  - Launch is anticipated to be Spring 2016
- Launch plan will include training for all MnCHOICES Support Plan users. Training anticipated to begin early 2016.

CSP and CSSP: Same but Different

- CSP and CSSP will look similar in the application. Users will see the same tabs.

- CSP and CSSP have different purposes. Information entered by the users (such as certified assessors and case managers) will be different in each. They generate two separate documents.

- CSP is created first. When CSP is closed, existing data in the CSP will be carried over into the CSSP.
